INTRODUCTION & BACKGROUND

Ai-Delivery Company is based in Africa and uses advanced blockchain technology for the transportation of commodities from one place to another. The token used by the company goes by the name of Ztranzit which is positively creating job opportunities in a great number for millions of people residing in developing as well as developed countries.

Ztranzit is a global earning platform that is focused on creating job opportunities for people in developing countries. The Ztranzit platform is easily accessible globally through an internet connection and a mobile phone. Anyone can post a delivery request which can be accepted by anyone within the locality.

This is done by employing peer to peer delivery system which can easily help the delivery of requested items. This can be employed to complete all sorts of delivery requests. The delivery request can be of any sort such as the delivery of items on a grocery list. The delivery can be made by anyone available at the grocery store. The only requirement for the delivery is that the delivery request is made through the online system using Ztranzit. The persons delivering the items are awarded incentives for the delivery services and through this system, people can easily earn by delivering door to door with ease.

THE UNDERLYING TECHNOLOGY

ZTNZ token is a TRC20 token developed on Tron network/blockchain. Like the rest of blockchain assets, the ZTNZ coin has its own value and is easily transferable like Bitcoin, Ethereum, Litecoin, Trx, etc.

The difference between ZTNZ and other Tron assets is that the ZTNZ token will be utilized as a payment method in the Ai-Delivery app and website after the delivery of the required commodities. Another pro feature of the ZTNZ is that it is easily convertible to fiat currency as per the requirements of the buyer and seller. This will be done through the Ai-Delivery app or website where the seller will be facilitated to place ZTNZ token adverts and the buyers will be accommodated to purchase the tokens through bank transactions.

This conversion feature also serves as a gateway for new members in the digital currency space to buy ZTNZ token directly using fiat currency (i.e. bank transfer) and later on convert ZTNZ to other digital cryptocurrency such as bitcoin, etc. using other exchange.

DISTINGUISHING FEATURES

The ZTNZ investors will be facilitated to use the tokens for the payment of delivery of the commodities through the ai-Delivery app since the ZTNZ tokens will be incorporated in the app beforehand which will allow the users to make payments through the ZTNZ token whenever and wherever necessary. ZTNZ token will be made available to all the users at all times which shall increase the usability and importance of the token.

The company intends to use the ZTNZ as the primary payment method in all of its platforms and subsidiaries in present as well as in the future with the growth of the company.

The first time users or new members registering themselves on the ai-Delivery app shall be required to buy the ZTNZ through fiat currency which will be further converted to ZTNZ for future payments of the services availed through the ai-Delivery app. This will be done to increase the usability and easy access to the ZTNZ.

In case, the new members are not willing to buy the ZTNZ at the time of registration on ai-Delivery app, they can easily earn the ZTNZ by completing the delivery requests made by the members on the Ai-Delivery app.

INTRODUCING THE PERFECT SOLUTION

The aim of the ai-Delivery platform is to create job opportunities for the common people from the developing countries of the Asian and African continent. The platform will provide equal opportunities for both professional and non-professional members through the advanced logistic and delivery system which is entirely focused and set up on the peer to peer system. The main asset of the ai-Delivery app are the members of the ZTNZ community and due to this reason, the 60% investment or funding of Initial Exchange Offering (IEO) will be utilized to advertise the platform on various advertisement platforms. The Ztranzit token will create ease of payment around the globe for all members.

The ai-Delivery app will help to connect the sellers and buyers community. The sellers will be able to deliver the requested items at a drop off location like the Uber app which can be easily collected by the buyer. The app will introduce features of peer to peer connection and trade section which will help the ZTNZ community within a particular area or location to convert the ZTNZ token to any local currency and vice versa. This will be done to increase the usability of the ZTNZ and encouraging the new members to invest in ZTNZ to set up their profile into the online system of the crypto ecosystem.

The ai-Delivery app will contain all ingredients of the easy and fast registration process on the ZTNZ system. Furthermore, the verification process shall be both online and physical which shall help in boosting the trust of the members on the system. The prerequisites for an agent is to own a bike, motorcycle or car (access to public transport) for easy and secure delivery of the items. The payment shall be done through the escrow system. The parties involved shall come to an agreement about the offer after negotiation and the payment will be deposited in the escrow system along with the fee which shall be released after the delivery of items. The “cash on delivery” feature will also be available to the parties and they can utilize it if they have enough ZTNZ stored in the app at the time of delivery to cover the escrow fee.

TIMELINE OF THE PROJECT

TOKEN DETAILS

Contract Type: TRC20

Token Environment: (Tron Network)

Contract Address:

TH1pMQU856owNz8HgRa2gWmGTwSb8XXMkF

Tronscan Address URL Link: ZTNZ explorer:

TOKEN DISTRIBUTION

The maximum limit for the Ztranzit token will be 3,000,000 (three million) out of which 1 million Ztranzit tokens will be secured with the company for a period of 4 years for any future development projects or advancement.

The development team will be granted 400,000 ZTNZ tokens which shall remain locked for a period of 2 years and will only be allowed to be distributed after the completion of 2 years. The company shall use 100,000 ZTNZ for the promotion and advertisement of the ZTNZ. 10% discount offer shall be available to the 1,500,000 ZTNZ which will mark up to \$0.40 per ZTNZ token in the Initial Exchange Offering (IEO) which will enable ten percent profit before trading commerce.

Here are some details about the token distribution:

- IEO price \$0.40
- IEO discount 10% to all buyers
- Minimum to buy 100 ZTNZ
- Total circulating supply - 1,600,000
- Total locked for 2 years and above - 1,400,00

TOKEN DISTRIBUTION TABLE

Distribution	Percentage	Amount Of ZTNZ
Total ZTNZ in existence	100%	3,000,000
Company holdings for future projects (locked for 4 years & above)	34%	1,000,000
Development team (locked for 2 years)	13%	400,000
Competition and promotions	3%	100,000
Initial exchange offering (IEO)	50%	1,500,000

TOKEN DISTRIBUTION CHART

MEET THE DREAM TEAM

The following three brains are behind this innovative idea:

Augustine Martins

Kyari Jonah

Elvis Bamaiyi

THE END RESULT

The funds raised during Initial Exchange Offer will be utilized on projects such as listing of ZTNZ, IOS and Android App building, Promotional and marketing campaigns, securing partnership deals, setting up of offices across major cities and countries, employment of staff, etc. We appreciate your support and will do our best to maintain the transparency and accountability to the community.

OUR COMMUNITY

The Ztarnzit community is growing day by day on the popular social media. We would appreciate your interest in the ZTNZ community and hope for you to join our community soon.
